AAX + AU + VST effect plugin for Mac/Windows/Linux

Version 1.1.3

- Added VST3 version for Linux
- Added a workaround for an audio framework bug in macOS 10.9-10.12
- New, more modern and future-proof preset manager backend
- Updated AAX framework
- Built against a newer JUCE 7 framework

Version 1.1.2

- Enhanced slider groove color contrast

Version 1.1.1

- Added AAX and VST3 versions for Windows
- Fixed permissions issue in the package installer that could in very rare cases cause the presets to not be readable by the plugin

Version 1.1.0

- Increased maximum average grain size from 350 to 500 ms
- Added multi-mode state-variable filter which can be applied before recording the input signal into the buffer
- Added sine LFO for synchronous modulation of grain speed and size
- Added send level control
- Added shortcut button to show the "open file" dialog with the list of preset banks
- Increased UI window size and control element width
- Added ability to reduce the window size down to 80%
- Increased shift+drag adjustment resolution for sliders
- Fixed an issue that could cause the preset name and the toggle buttons to abruptly lose their correct styling
- Enhanced and more detailed user manual
- Added new factory presets

Version 1.0.5

- Added support for tail time property
- Added high-resolution slider adjustment via shift+drag
- Increased slider click response area
- Multiple minor visual enhancements

Version 1.0.4

- Improved behavior when receiving the reset() call from the host
- Added a workaround for a UI size bug in macOS Big Sur

Version 1.0.3

- Freeze mode now operates via an exponential gate, making the switch completely silent under all circumstances

Version 1.0.2

- Minor user interface alignment enhancements
- Added native support for Apple Silicon processors

Version 1.0.1

- Fixed incorrect manufacturer ID that could cause the plugin to not show up in the host
- Fixed incomplete plugin initialization that could cause a crash during validation
